DETAILED ACTION

Response to Arguments

1. Applicant's arguments, filed on 9/26/2008, with respect to the rejection(s) of claim(s) 38-75 under 35 USC 112 second paragraph and claim(s) 38, 39, 46, 56-58, 65 and 75 under 35 USC 102(e) have been fully considered and are persuasive.

Therefore, the rejection has been withdrawn.

2. Applicant's arguments with respect to claims 76-78 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 76-78 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

- With regard claims 76-78, the claim limitation direct to a computer program that is a functional descriptive material and is not statutory. Data structures not claimed as embodied in computer-readable media are descriptive material per se and are not statutory because they are not capable of causing functional change in the computer. See, e.g., Warmerdam, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure per se held nonstatutory). Such claimed data structures do not define any structural and functional interrelationships between the data structure and other claimed aspects of the invention which permit the data structure's functionality to be realized. In contrast, a claimed computer-readable medium

encoded with a data structure defines structural and functional interrelationships between the data structure and the computer software and hardware components which permit the data structure's functionality to be realized, and is thus statutory. Similarly, computer programs claimed as computer listings per se, i.e., the descriptions or expressions of the programs are not physical "things." They are neither computer components nor statutory processes, as they are not "acts" being performed. Such claimed computer programs do not define any structural and functional interrelationships between the computer program and other claimed elements of a computer which permit the computer program's functionality to be realized.

Allowable Subject Matter

5. Claims 38-75 are allowed.
6. The following is an examiner's statement of reasons for allowance.
 - The prior art fails to teach an apparatus of Claims 38, 52, 55, 57, 71, 74 and 75 that specifically comprises the following:
 - The instant application is deemed to be directed to a non-obvious improvement over the admitted prior art of the instant application and the invention patented in Pat. No. US 6,782,036, US 6,304,618, US 2002/0132600 and WO 0052845. The improvement comprises:
 - With regard claims 38, 52, 55 and 75, "wherein said processor is configured, for each already determined estimate of at least one of the

estimate of the first one of said signals and the estimate of the second one of said signals, to extend each of the at least one already determined estimate with a plurality of potential values, wherein said estimate of said second one of said signals takes into account the estimate of the first signal and the estimate of the first signal is modified in dependence on the estimate of the second signal.” as recited in combination with other limitation as claimed in claims 38, 52, 55 and 75, respectively,

With regard claims 57, 71 and 74, “extending each already determined estimate of at least one of the estimate of the first one of said signals and the estimate of the second one of said signals with a plurality of potential values, wherein said estimate of said second one of said signals takes into account the estimate of the first signal and the estimate of the first signal modified in dependence on the estimate of the second signal.” as recited in combination with other limitation as claimed in claims 57, 71 and 74, respectively.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
8. A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2611

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
